

WHAT IS CLAIMED IS:

1. A corner mounted indirect lighting fixture comprising:

5 a mounting bracket adapted to be installed at a right angle junction between two vertical walls, said mounting bracket having an engaging edge;

10 a fixture housing having an internal chamber, said fixture housing having an exterior surface, a hook mounted on said exterior surface, said hook to engage with said engaging edge to supportingly secure said fixture housing to said mounting bracket, said fixture housing having a top edge and a bottom edge, a light diffusing plate mounted at said bottom edge, said top edge being open;

15 a lamp mounted to said fixture housing, said lamp having a glass bulb, said lamp extending outwardly from said mounting bracket so said glass bulb is spaced from said fixture housing to decrease the possibility of heat being applied to said fixture housing during operation of said lamp; and

20 a shade attached to said fixture housing, said shade being translucent to emit a soft appearing glow from said lamp.

2. The corner mounted indirect lighting fixture as defined in Claim 1 wherein:

said fixture housing being constructed of sheet material.

5 3. The corner mounted indirect lighting fixture as defined in Claim 1 wherein:

said fixture housing having sidewalls, said sidewalls being vertically oriented so each said sidewall is to abut flush against a vertical wall of the two vertical walls on which the mounting bracket is adapted to be installed.

4. The corner mounted indirect lighting fixture as defined in Claim 3 wherein:

each of said sidewalls having a free edge defining a pair of free edges, said free edges being parallel.

15 5. The corner mounted indirect lighting fixture as defined in Claim 1 wherein:

said lamp being mounted at an inclined angle to locate said glass bulb near said top edge permitting maximum usage of the light emitted from said lamp that is emitted from top edge.

20 6. The corner mounted indirect lighting fixture as defined in Claim 1 wherein:

said diffusing plate comprising a screen constructed of polished metal or painted white.
